# ECHOES OF MEMORY

ECHOES OF MEMORY

COURSE PROJECT |  
GARMENT  
EXECUTION

Theme: Traces of Life

Concept: Echoes of Memory

The concept is based on the legend of a ghost at the Murataaly Kurenkeyev National Music College. Prior to its demolition, students spoke of a friendly entity that would appear before musicians when they were alone, watching over them without causing any harm.

The goal of the garment was to express the music that the ghost presumably loves through smooth lines mimicking melody and repeating rhythms. The concept of "remnants of life" is reflected through a degree of randomness and subtly broken curves. Together, they are meant to embody the question: what became of the ghost once this architectural landmark was demolished, and does it still remain?
